WHY YOU'RE HERE & WHAT YOU'LL MASTER TODAY

WHY YOU'RE HERE

The real estate market has never been more competitive. Agents who leverage AI tools are outpacing those who don't by 3-5x in productivity and lead conversion. You're here to close that gap permanently.

YOUR GOAL TODAY

Master 5 profit-generating systems using Perplexity Computer that will save you 17-27 hours per week — time you'll reinvest into more listings, more closings, and more revenue.

SUCCESS METRIC

By end of today: implement at least 1 complete system before your next business day. Within 30 days: all 5 systems running and producing measurable ROI in your business.

WORKSHOP OVERVIEW: YOUR 5 PROFIT-GENERATING SYSTEMS

SYS #	SYSTEM NAME	WHAT IT DOES	TIME SAVED / WEEK
1	The Unfair Research Advantage	Real-time market research, deep CMAs, neighborhood intelligence in 10 minutes instead of 90	5-7 hours
2	The Marketing Content Machine	SEO-optimized listings, social packages, email campaigns, video scripts — researched & written instantly	4-6 hours
3	The Client Experience Weapon	Personalized client communication at scale — anniversary messages, equity updates, drip campaigns	3-5 hours
4	The Listing Presentation Destroyer	Full competitive briefs, seller prep, expired & FSBO scripts — win more listings in 20 minutes	3-4 hours
5	The Business Operations Autopilot	Lead research, transaction coordination, negotiation strategy, weekly planning — fully automated	2-5 hours

THE BOTTOM LINE

17-27 hours saved every single week. That's an extra full-time employee's worth of productivity — except this one works 24/7, never calls in sick, and costs less than \$30/month. Agents who implement all 5 systems report doubling their active listings within 60 days.

SYSTEM 1 OF 5 — "THE UNFAIR RESEARCH ADVANTAGE"

WHAT MAKES THIS A GAME-CHANGER

Perplexity Computer doesn't just search the web — it acts as an autonomous research agent that browses real-time sources, cross-references data, and synthesizes findings into professional-grade reports while you're doing something else. Traditional research takes 60–90 minutes per CMA. With Perplexity Computer, a complete deep-dive neighborhood analysis with school ratings, market trends, walkability scores, recent sales data, and competitive positioning takes under 10 minutes. That's not an incremental improvement — that's a complete transformation of how you prepare for client meetings.

This asymmetric intelligence advantage directly translates into listing wins. When you walk into a presentation armed with hyper-local market data, buyer demographic profiles, pricing psychology insights, and investment projections that took you 10 minutes to produce, you demonstrate a level of preparation that competing agents simply cannot match. Clients choose the agent who knows the most — and you will always know the most.

The compound effect is what truly separates top producers: each week you run these research systems, your market knowledge deepens, your pattern recognition sharpens, and your pricing accuracy improves. The agents who master System 1 consistently report that their listing price accuracy increases by 8–12%, reducing days on market and increasing seller confidence — which generates more referrals from every transaction.

REVENUE IMPACT

If winning just **one additional listing per month** by out-preparing every competitor sounds good to you, System 1 alone pays for your Perplexity Computer membership 50–100x over. At average GCI of \$12,000–\$20,000 per listing, a single additional win per month represents \$144,000–\$240,000 in incremental annual revenue. The research advantage is real — and it starts the moment you implement your first prompt.

RESEARCH & MARKET INTELLIGENCE: PROFIT-GENERATING PROMPTS

1 • DEEP NEIGHBORHOOD ANALYSIS

Research [NEIGHBORHOOD], [CITY] comprehensively: current median home prices and 12-month trend, school ratings (GreatSchools), walkability/transit scores, top employers within 5 miles, new developments planned, crime statistics vs. city average, demographic shifts, and 3 buyer profiles this neighborhood attracts. Format as a professional client-ready report.

2 • RAPID COMPETITIVE MARKET ANALYSIS

Pull current market data for [CITY/ZIP]: active listings count, median days on market, list-to-sale price ratio, inventory months supply, and 5 most recent comparable sales for a [BEDS/BATHS/SQFT] home. Include pricing recommendations and talking points I can use with a seller who thinks their home is worth more than market data supports.

3 • BUYER NEIGHBORHOOD MATCH REPORT

My buyer wants: [CRITERIA – schools, commute, lifestyle]. Research and rank the top 3 neighborhoods in [CITY] that match these priorities. For each: pros/cons, price range, school ratings, commute time to [WORKPLACE], and one hidden gem fact that will impress them.

4 • INVESTMENT PROPERTY ANALYSIS

Analyze [ADDRESS] as a rental investment: current market rent for similar units, estimated cap rate and cash-on-cash return at [PURCHASE PRICE] with [DOWN PAYMENT]%, local rental vacancy rates, rent growth trend 3 years, and top 3 risks + mitigations. Include a one-page investor summary I can send to my client.

5 • SELLER'S MARKET UPDATE REPORT

Create a personalized market update for my client at [ADDRESS]: their home's current estimated value range based on recent comps, how the market has changed since they bought in [YEAR], projected value in 12-24 months, and whether now is a good time to sell. Write it in a warm, professional tone as if I wrote it personally.

6 • LUXURY MARKET INTELLIGENCE BRIEF

Research the luxury market (\$[PRICE]M+) in [CITY/NEIGHBORHOOD]: absorption rate, average days on market, price-per-sqft trends, buyer demographics (domestic vs. international, cash vs. financed), top amenities driving premium pricing, and competitive landscape. Prepare talking points for a luxury listing appointment.

SYSTEM 1 ACTION WORKSHEET

Hours spent on research/week now	Hours with Perplexity (estimate)	Hours saved × \$[rate] = weekly value
----------------------------------	----------------------------------	---------------------------------------

First 3 research tasks I'll run TODAY:

SYSTEM 2 OF 5 — "THE MARKETING CONTENT MACHINE"

WHY CONTENT QUALITY HAS NEVER MATTERED MORE

Most agents treat marketing content as an afterthought — a hurried listing description written at midnight, a social post grabbed from a template library, an email newsletter that hasn't changed in three years. The problem isn't effort; it's time. Creating genuinely compelling, neighborhood-specific, SEO-optimized content used to require hours of research followed by hours of writing. Perplexity Computer collapses that entire process into minutes by researching the property, neighborhood, and target buyer profile before generating content — so the output isn't generic, it's specific, compelling, and conversion-ready.

The SEO dimension is where fortunes are made. When your property descriptions include the specific keywords buyers search — school names, neighborhood nicknames, nearby landmarks, lifestyle phrases — your listings appear higher in organic search results and get more views without paid promotion. Agents using AI-assisted SEO content report 40–70% more online listing views versus agents using standard MLS descriptions. More views equal more showings. More showings equal more offers. More offers equal higher final sales prices.

The compounding effect of System 2 is the most powerful of all five systems. Every piece of content you produce with Perplexity Computer builds your digital presence, strengthens your personal brand, and trains your sphere of influence to see you as the local expert. Agents producing consistent, high-quality content get 40–60% more inbound leads within 90 days — leads that come to you pre-sold on your expertise, requiring far less nurturing and closing effort than cold leads.

REVENUE IMPACT

Consistent content generators in real estate get **40–60% more inbound leads** than agents with minimal digital presence. If your average lead converts at \$8,000 GCI and you generate just 3 additional inbound leads per month from better content, that's \$24,000/month — \$288,000/year — in incremental revenue from a system that takes 2 hours per week to run instead of 8–12.

MARKETING CONTENT MACHINE: PROFIT-GENERATING PROMPTS

1 • MLS LISTING DESCRIPTION (SEO-OPTIMIZED)

Write an SEO-optimized MLS listing description for [ADDRESS]: [BEDS/BATHS/SQFT], [KEY FEATURES]. Research the neighborhood highlights, nearby schools ([NAMES]), and lifestyle amenities. Include search keywords buyers use. Max 500 words. Tone: compelling, specific, no clichés. End with a strong call to action.

2 • FULL SOCIAL MEDIA CONTENT PACKAGE (ONE PROPERTY)

Create a complete social media package for [ADDRESS] listing at \$[PRICE]: (1) Instagram caption with 15 hashtags, (2) Facebook post for buyers, (3) LinkedIn post positioning me as a market expert, (4) Instagram Story sequence 5 frames, (5) TikTok script 45 seconds. Make each platform-native and engagement-optimized.

3 • MONTHLY EMAIL NEWSLETTER

Write my [MONTH] real estate newsletter for [CITY]: (1) market snapshot with 3 key stats, (2) featured listing highlight, (3) buyer tip of the month, (4) seller insight, (5) neighborhood spotlight on [AREA], (6) personal note from me. Tone: informative, friendly, expert. Subject line options: 3. Total length: 400-500 words.

4 • VIDEO SCRIPT (MARKET UPDATE / YOUTUBE)

Write a 3-minute YouTube script: "[CITY] Real Estate Market Update – [MONTH] [YEAR]." Include hook (first 10 seconds), 3 key market stats with commentary, what it means for buyers vs. sellers, my prediction for next 90 days, and strong CTA to call/text me. Add [B-ROLL SUGGESTIONS] in brackets. Conversational, confident tone.

5 • 5-EMAIL DRIP SEQUENCE (NEW LEAD)

Create a 5-email nurture sequence for a new buyer lead in [CITY] who is [TIMEFRAME] from buying. Email 1 (day 1): Welcome + market overview. Email 2 (day 3): Neighborhood guide. Email 3 (day 7): Financing tips. Email 4 (day 14): What to look for at showings. Email 5 (day 21): Are you ready to make an offer? Each: subject line, preview text, 150-200 words.

6 • OPEN HOUSE FOLLOW-UP EMAIL

Write an open house follow-up email to someone who visited [ADDRESS]. Reference the property's top 3 features. Include: similar listings I can show them, a soft call to action, and a P.S. with a market insight. Personalize with placeholder [VISITOR NAME]. Warm, helpful tone – not pushy. 150 words max.

SYSTEM 2 ACTION WORKSHEET

Top 3 listings to create full content packages for:

Current monthly outsourcing cost for copywriting:

Questions to ask Perplexity about my market:

SYSTEM 3 OF 5 — "THE CLIENT EXPERIENCE WEAPON"

THE REFERRAL ENGINE HIDDEN IN YOUR DATABASE

The National Association of Realtors consistently reports that 82% of real estate transactions come from referrals and repeat business — yet the average agent loses 70% of their past clients to competitors within 5 years of the initial transaction. Why? Not because the agent did a bad job. Because they disappeared. The single most valuable business development activity any real estate agent can do is systematically, consistently, and personally stay in touch with every past client and sphere contact — and almost no one does it because it requires too much time to do well. Perplexity Computer changes that equation completely.

With System 3, you can create genuinely personalized, deeply relevant communications for your entire database in a fraction of the time it used to take. A closing anniversary message that references their specific neighborhood market conditions, their kids' school district, a restaurant that just opened nearby — that level of personalization creates an emotional connection that generic "just checking in" messages never achieve. Perplexity Computer researches the current state of your client's world before crafting each message, so every touchpoint feels like you spent an hour thinking about them personally.

The math of consistent database outreach is staggering. If you have 200 past clients and sphere contacts, and you convert just 2% more per quarter to referral sources through better communication, that's 4 additional referrals per quarter — 16 per year — at average GCI of \$12,000 per transaction. System 3 alone can generate \$192,000 in incremental annual GCI from contacts you already have.

REVENUE IMPACT

One extra referral per quarter — from clients who already trust you and would gladly refer if you stayed top of mind — equals **\$15,000–\$40,000 in additional GCI annually**. Agents who implement systematic client communication with Perplexity Computer report their referral rate increases by 35–50% within 90 days of consistent outreach. Your database is your most valuable asset. System 3 is how you monetize it.

CLIENT EXPERIENCE WEAPON: PROFIT-GENERATING PROMPTS

1 • PERSONALIZED CLOSING ANNIVERSARY MESSAGE

Write a closing anniversary message for [CLIENT NAME] who bought [ADDRESS] on [DATE]. Research current market value estimate for their home, one notable neighborhood update in the past year, and one local event happening this month. Make the message warm, personal, and end with a soft offer to provide a full home value analysis. 120 words max.

2 • NEIGHBORHOOD EQUITY UPDATE (PAST CLIENT)

Create a personalized equity update for [CLIENT NAME] at [ADDRESS] who purchased at \$[PRICE] in [YEAR]. Research current estimated value, equity gained, neighborhood price trend, and whether it's a good time to sell, refinance, or leverage equity. Format as a one-page letter I can mail or email. Professional but conversational tone.

3 • NEW CLIENT WELCOME PACKAGE

Create a new client welcome package for [CLIENT NAME] buying in [NEIGHBORHOOD/CITY]. Include: (1) welcome letter from me, (2) neighborhood guide with top 10 local recommendations, (3) my buyer process checklist, (4) important local contacts (utilities, DMV, etc.), (5) a personal note about what makes this area special. Warm, expert, locally specific.

4 • PRE-LISTING SELLER CONSULTATION PREP

Prepare me for a listing consultation with [SELLER NAME] at [ADDRESS]. Research: current estimated value range, 5 recent comps, neighborhood demand level, average days on market, suggested list price strategy, staging recommendations for this property type, and 3 objections they might raise with scripted responses. Format as a briefing I can review in the car.

5 • BUYER'S PROPERTY MATCH SUMMARY

I'm showing [BUYER NAME] properties tomorrow. They want: [CRITERIA]. Create a personalized property comparison summary for these 3 addresses: [ADDRESS 1], [ADDRESS 2], [ADDRESS 3]. For each: pros/cons vs. their criteria, estimated 5-year appreciation, neighborhood notes. Add a recommendation section on which fits their needs best and why.

6 • DATABASE REACTIVATION CAMPAIGN

Write a 3-message reactivation sequence for past clients I haven't contacted in 12+ months. Message 1: market update reconnect. Message 2: personal equity check-in. Message 3: referral ask with value offer. Each message: 100 words, subject line, friendly but professional. Goal: reconnect, provide value, and surface anyone ready to buy/sell/refer in the next 90 days.

SYSTEM 3 ACTION WORKSHEET

Past clients for equity updates (top 5):	Total database contacts:	Referrals received last 12 months:
	Inactive (12+ months):	Target referrals with System 3:
	Goal contacts/month:	GCI impact at avg \$[] per referral:

SYSTEM 4 OF 5 — "THE LISTING PRESENTATION DESTROYER"

WIN MORE LISTINGS. EVERY SINGLE TIME.

The listing presentation is the highest-leverage moment in a real estate agent's business. Win it and you control the inventory. The agents who win the most listings don't simply have better charm or better marketing materials — they have better preparation. They walk into every appointment knowing more about the seller's home, the local market, and the competition than any other agent in the room. Perplexity Computer builds a complete competitive intelligence brief — property analysis, comparable sales, pricing strategy, seller motivation research, objection scripts — in under 20 minutes.

System 4 also covers the highest-ROI prospecting activities in real estate: expired listings and FSBOs. Both represent motivated sellers who have already decided to sell. With Perplexity Computer, you can research each expired or FSBO property, understand why it didn't sell, and craft a hyper-personalized outreach message that speaks directly to their specific situation — converting at 3–5x the rate of generic outreach scripts.

LISTING PRESENTATION DESTROYER: PROFIT-GENERATING PROMPTS

1 • COMPLETE LISTING PRESENTATION BRIEF

Build a complete listing appointment brief for [ADDRESS]: seller name [NAME], listed at [RANGE]. Include: CMA with 5 comps, recommended list price and rationale, days-on-market projection, marketing plan bullet points, commission objection scripts, and 3 reasons they should list with me over any other agent. Format as a pre-appointment briefing document.

2 • SELLER'S NET PROCEEDS ESTIMATE

Create a seller's estimated net proceeds worksheet for [ADDRESS] at list price \${PRICE}: closing costs breakdown, agent commission scenarios (5% vs 6%), transfer taxes in [STATE/COUNTY], estimated mortgage payoff at \${BALANCE}, and net proceeds in 3 scenarios (full price, 97%, 95%). Format as a clean table I can present at the appointment.

3 • EXPIRED LISTING OUTREACH LETTER

Write a personalized outreach letter to the owner of [ADDRESS], an expired listing. Research why similar homes in this area didn't sell (pricing, staging, marketing gaps). Write a letter that acknowledges their frustration, identifies the likely reason it didn't sell, and presents my specific solution. Empathetic, confident, no generic pitches. 200 words max.

4 • FSBO CONVERSION SCRIPT

Write a phone script and follow-up text for a FSBO at [ADDRESS] listed at \${PRICE}. Research: what FSBOs typically net vs. agent-listed homes, common FSBO pain points, and this property's market position. Script should: build rapport, ask discovery questions, address the "I'll save the commission" objection, and plant the seed for a listing appointment. Respectful, not pushy.

SYSTEM 4 — MY UPCOMING LISTING APPOINTMENTS

Address / Appointment Date

Expired Listings to Target

FSBOs in My Market

SYSTEM 5 OF 5 — "THE BUSINESS OPERATIONS AUTOPILOT"

RECLAIM 15+ HOURS EVERY WEEK — STARTING NOW

The average top-producing agent spends 60% of their time on activities that don't directly generate revenue: administrative tasks, transaction coordination, lead research, scheduling, and business planning. System 5 is Perplexity Computer acting as your autonomous operations agent — handling the operational backbone of your business so you can focus exclusively on high-value activities like building relationships, going on appointments, and negotiating deals.

The most immediate impact comes from lead research. Before your first call with any new lead, Perplexity can research their social profiles, neighborhood interests, likely budget range, and any recent life events driving their real estate decision. Walking into a first call with this intelligence transforms your conversion rate. Combine this with automated transaction checklists, AI-drafted negotiation strategies, and weekly business planning — and you have a business that runs at a level most agents don't achieve until year 10.

BUSINESS OPERATIONS AUTOPILOT: PROFIT-GENERATING PROMPTS

1 • LEAD RESEARCH BEFORE FIRST CALL

Research this lead before I call them: Name [NAME], email [EMAIL], interested in [AREA/PRICE RANGE]. Find: LinkedIn or public social info, likely life stage, what's probably motivating their search, 3 questions to ask that will build rapport instantly, and the one thing I should NOT say. Format as a 2-minute pre-call brief.

2 • TRANSACTION COORDINATION CHECKLIST

Create a complete transaction coordination checklist for [BUYER/SELLER] transaction at [ADDRESS], closing [DATE]. Include all deadlines: inspection contingency, financing contingency, appraisal, title search, walkthrough, closing. Add: who is responsible for each item, what I need to follow up on today, and any state-specific requirements for [STATE].

3 • NEGOTIATION STRATEGY BRIEF

Build a negotiation strategy for my client making an offer on [ADDRESS] listed at \$[PRICE]. Research: days on market, price history, comparable recent sales, seller motivation signals. Recommend: offer price, contingencies to include/waive, escalation clause parameters, and 3 concessions to ask for beyond price. Include a counter-offer response strategy.

4 • WEEKLY BUSINESS PLANNING

I'm a real estate agent in [CITY]. This week I have: [ACTIVE LISTINGS], [BUYER CLIENTS], [APPOINTMENTS], [LEADS TO FOLLOW UP]. Help me build my ideal week: prioritized daily schedule, top 3 dollar-productive activities each day, and one business development action I should take this week that I'm probably avoiding. Be direct and specific.

5 • INSTANT PROPERTY ALERT SUMMARY

A new listing just hit the market at [ADDRESS] for \$[PRICE]. My buyer [NAME] has criteria: [CRITERIA]. Research this property and write a personalized property alert: headline, why it matches their criteria, 3 specific highlights, one potential concern to discuss, and a call to action to schedule a showing today. 150 words. Urgent, helpful tone.

SYSTEM 5 — OPERATIONS AUDIT

Admin tasks I'll hand off to Perplexity (top 3):

Hours/week on operations now:

Target hours after System 5:

Revenue value of hours reclaimed:

YOUR 30-DAY PROFIT PLAN

Use this as your weekly roadmap. Check off each item as you complete it. Your goal: all 5 systems active within 30 days.

WEEK 1 • FOUNDATION SETUP

- ☐ Activate Perplexity Computer subscription at perplexity.ai
- ☐ Run System 1 prompt #1 on your top listing market
- ☐ Create first SEO-optimized listing description (System 2)
- ☐ Write 3 closing anniversary messages for this month (System 3)
- ☐ Identify 5 expired listings to target with System 4
- ☐ Run lead research brief before your next new lead call (System 5)

WEEK 2 • BUSINESS INTEGRATION

- ☐ Run deep CMA on every active listing using System 1
- ☐ Create full social media package for 2 listings (System 2)
- ☐ Launch database reactivation campaign — 20 contacts (System 3)
- ☐ Complete 2 listing appointment briefs with System 4
- ☐ Build first transaction coordination checklist (System 5)
- ☐ Track time saved vs. manual methods — record baseline

WEEK 3 • OPTIMIZATION & SCALING

- ☐ Refine your top 3 prompts based on output quality
- ☐ Draft monthly email newsletter with System 2 (send to full list)
- ☐ Send neighborhood equity updates to 10 past clients (System 3)
- ☐ Contact 3 FSBOs using System 4 scripts
- ☐ Build your weekly business plan with System 5
- ☐ Calculate ROI: time saved × hourly rate + new opportunities

WEEK 4 • ROI MEASUREMENT

- ☐ Complete your ROI Tracker (Page 13) with real numbers
- ☐ Identify which system generated the highest-value opportunity
- ☐ Share results with your accountability partner
- ☐ Set Month 2 targets: more listings, contacts, or content volume
- ☐ Attend Edmund's next Mastermind session to share wins
- ☐ Refer one colleague who needs this — they'll thank you

30-DAY COMMITMENT

Agents who follow this plan exactly report an average of **\$47,000 in new pipeline** within their first 30 days of full implementation. The results are real. The only variable is your commitment to executing. Start today — not tomorrow.

LIVE DEMO NOTES — CAPTURE WHAT EDMUND BUILDS ON SCREEN

THE PERPLEXITY COMPUTER DOMINATION MANIFESTO

"While my competitors are debating whether AI will replace them, I'm using it to replace their market share."

Perplexity Computer doesn't make me lazy — it makes me unstoppable. It gives me the research of a 10-person team, the marketing output of a full agency, and the client communication of a dedicated concierge. I am not afraid of AI. I am powered by it.

I will show up to every listing appointment more prepared than any agent in this city. I will produce content my competitors can't match. I will stay so present in my clients' lives that referring me is their first instinct. I will run my business with the precision of a Fortune 500 company and the heart of someone who genuinely loves helping people find their home.

The market doesn't care about my effort — it rewards my results. Perplexity Computer multiplies my results. Starting today, I multiply my impact. Starting today, I dominate.

WRITE YOUR PERSONAL SUCCESS STATEMENT

In my own words, what winning with Perplexity Computer looks like for ME:

SUPPORT & RESOURCES

Edmund's Mastermind: Ongoing group coaching, live implementation sessions, and member community. Your questions get answered, your wins get celebrated. This is your tribe.

Technical Support: Contact Eytan Benzeno for Perplexity Computer setup, advanced prompt engineering, and integration support.

Weekly Office Hours: Join Edmund's live office hours every week to bring your real-world prompts and get feedback. Details sent to your email.

Perplexity Computer Membership: Starting from \$30/month at www.reignation.com — the single highest-ROI investment in your real estate business today.

YOUR NEXT STEP — RIGHT NOW

Open Perplexity Computer on your phone or laptop right now. Paste one prompt from this workbook. Watch what it builds for you in under 60 seconds. That feeling of "I can't believe this just happened" — that's your new normal. **Act today. Not tomorrow. Today.**
