

PROPOSAL FOR JOHN BEHM · THANKS A LOCK

- AI-POWERED MODERNIZATION — BOCA RATON, FL

30 Years of Trust. Now Working 24/7. You Own It Forever.

A new website, an AI chatbot, an AI receptionist that answers your phones around the clock, online booking, and an e-commerce store with dropship integration — **all built into code that you own outright.** No subscription. No hostage situation. No monthly bill that never ends.

30+

YEARS OF REPUTATION

\$13K

ONE-TIME, YOURS FOREVER

— WHERE THANKS A LOCK STANDS TODAY

The Reputation Is Solid. The Storefront Is Working. The Internet Is Not.

After visiting the showroom and reviewing the digital footprint, here's the honest gap analysis. The business is excellent. The way it shows up online — and the customers it could be capturing — is leaving real money on the table every week.

WHAT'S WORKING AGAINST YOU

- ✗ Website is dated and likely turning prospects away before they call
- ✗ No way to browse safes online — customers can't research before walking in
- ✗ After-hours calls go to voicemail (or to competitors)
- ✗ Zero social media presence — invisible on Instagram, Facebook, Google for new buyers
- ✗ Marketing is 100% word-of-mouth — no leverage, no compounding
- ✗ Walk-ins drive the business — but you can't scale walk-ins
- ✗ Showroom inventory is the only inventory — floor space caps revenue

WHAT'S WORKING FOR YOU

- ✓ 30+ years of trust and a real, established storefront on Glades Rd
- ✓ A-rated on Angie's List, ALOA member, strong Yelp reviews
- ✓ Strong distributor relationships (Amsec, Emtek/Assa Abloy, Gardall)
- ✓ ~50% margins on safes — an \$11K safe = \$5,500 gross profit
- ✓ Property management division gives you recurring B2B
- ✓ Boca/Delray/Broward coverage — a wide affluent service area
- ✓ Positioned as the trusted local alternative to scam locksmiths

WHERE WE TAKE YOU

Same Trust. Same Showroom. New Reach.

We don't change what's working. We bolt the AI age onto the trust you already built. Customers who Google "buy a safe in Boca Raton" at 9pm on a Tuesday should land on *your* site, get answers from *your* AI, schedule a delivery, and pay a deposit — all before you even open the next morning.

The 90-Second Pitch

You currently sell safes one at a time, to whoever walks through the door. We're going to give you a digital storefront that's open 24/7, an AI receptionist that answers every call, an AI chatbot that walks customers through your full catalog, and a dropship pipeline that lets you sell *any* safe Amsec or Gardall makes — without it ever touching your floor. Your reputation does the marketing. The AI does the closing.

— THE DIFFERENCE THAT MATTERS

You Own The Code. Forever.

You looked at a locksmith-specific platform that wanted ~\$560/month and discovered the catch: every line of content, every customer record, every product page lives on *their* servers. Cancel the subscription — you lose everything. We do the opposite.

THE SAAS LOCK-IN TRAP

- ✗ ~\$560 / month forever — **\$6,720 / year, \$33,600 over 5 years**
- ✗ Code lives on the vendor's servers — you can't see it, can't move it
- ✗ Cancel = the website goes dark and your content is gone
- ✗ Vendor controls hosting, domain, AI configuration, all upgrades
- ✗ If they raise prices, you have no leverage — the cost of leaving is starting over
- ✗ Year 5: you've paid \$33K and still own nothing

THE BOGEN.AI OWNERSHIP MODEL

- ✓ **\$13,000 one-time** — complete build, all 3 phases, no recurring fee from us
- ✓ Code delivered to *your* GitHub repo — you own every line
- ✓ Hosted on *your* cloud account (Vercel / AWS) — we set it up, you control it
- ✓ AI APIs (OpenAI, Twilio) on *your* keys — pay providers directly, no markup
- ✓ Domain, content, customer database, product catalog — all yours, transferable any time
- ✓ If we part ways tomorrow, the site keeps running. Hire any developer to maintain it.

Mo. 24

CROSSOVER POINT

Where you've already saved
money

Written Into the Contract

On day one, you receive: (1) the GitHub repository with all source code, transferred to your account; (2) admin access to the Vercel/AWS hosting account in *your* name; (3) a documented runbook for every system; (4) ownership of every API key, domain, and customer record. **If our relationship ever ends, nothing about your website changes.** That's the deal.

— WHAT WE BUILD

Scope of Work

A complete digital modernization, delivered in three phases over six months. Each phase pays for itself before the next one starts.

Modern Website

Complete rebuild — fast, mobile-first, SEO-optimized. Showcases the showroom, the safes, the property management division, and the 30-year reputation. Built to actually convert.

PHASE 1 · FOUNDATION

AI Chatbot

Embedded on every page. Answers product questions, quotes rekey jobs, explains the difference between a B-rate and a TL-30 safe, books service calls, and captures leads — in English or Spanish, around the clock.

PHASE 1 · 24/7 CAPTURE

AI Receptionist

Answers your inbound calls with full knowledge of your products, services, hours, and pricing. Books appointments, takes deposits, escalates real lockout emergencies to your tech, and sends you a transcript of every call.

PHASE 2 · PHONE CAPTURE

Online Booking System

Customers self-schedule rekeys, lock installs, safe deliveries, and consultations. Calendar syncs with your team. Deposits collected up front. No more phone tag.

PHASE 2 · SELF-SERVE

E-Commerce Storefront

Your full safe and lock inventory online. Filter by size, fire rating, price. Configure, pay a deposit or in full, schedule white-glove delivery and install. Stripe checkout, secure payments.

PHASE 3 · ONLINE SALES

Dropship Integration

Wire your storefront directly to Amsec, Emtek/Assa Abloy, and Gardall catalogs. Sell hundreds of safes that never touch your floor — the distributor ships, you keep the margin.

PHASE 3 · ZERO-INVENTORY SALES

Unified Knowledge Base

One source of truth for every product, service, FAQ, hours, location detail, and pricing rule. Powers the chatbot, the AI receptionist, the website — update it once, everything updates.

PHASE 1 · BRAIN

Local SEO & Google Profile

Rank for "Boca Raton locksmith," "buy safe Florida," "rekey Delray Beach." Optimize the Google Business Profile, refresh the photos, harvest more reviews from happy customers.

PHASE 1 · VISIBILITY

Monthly Performance Report

Every month: how many calls the AI answered, how many bookings came in online, what your top-selling SKUs are, where the leads are coming from, and what to double down on next.

ONGOING

DISTRIBUTOR CATALOGS INTEGRATED

Amsec

Emtek / Assa Abloy

Gardall

+ any vendor with an API or CSV feed

— WHY THIS PENCILS OUT

The Math

You sell safes from \$500 to \$11,000+ at roughly 50% gross margin. The investment to modernize the entire business is recovered with a small handful of incremental sales — sales you're currently leaving on the table because there's no website, no online checkout, and no one answering the phone after 6pm.

\$11,000

HIGH-END SAFE

Showroom inventory

50%

GROSS MARGIN

Industry standard

\$5,500

GP / SAFE

\$11K × 50%

2–3

SAFES TO BREAK EVEN

\$13K build ÷ \$5,500 GP

Where the New Sales Come From

1) **After-hours calls** — the AI receptionist answers calls when the showroom is closed (currently lost to voicemail or competitors). 2) **Online safe browsers** — the customer who Googles "buy gun safe Boca Raton" at 10pm now lands on your store and checks out before bed. 3) **Dropship catalog** — your store now lists hundreds of safes you don't stock; the distributor ships, you keep the margin. 4) **Property management referrals** — bookings flow in 24/7 instead of being throttled by office hours.

— PRICING

Investment — One-Time, No Subscription

Three phases, three fixed prices, paid as each phase kicks off. When the build is done, the bill is done. Support after launch is à-la-carte and only when you actually need it.

PHASE	WHAT YOU GET	INVESTMENT
PHASE 1 · FOUNDATION (MONTHS 1–2)		
Website + Chatbot + Knowledge Base + Local SEO	New site, embedded AI chatbot, knowledge base build, Google Business optimization, on-page SEO, photography refresh, mobile-first launch. Code delivered to your GitHub.	\$5,000
PHASE 2 · AUTOMATION (MONTHS 3–4)		
AI Receptionist + Online Booking	AI phone agent trained on your knowledge base, call routing, deposit-taking flow, online booking system, calendar sync, deposit capture via Stripe. All on your accounts.	\$3,500
PHASE 3 · COMMERCE (MONTHS 5–6)		
E-Commerce + Dropship Integration	Full storefront, product catalog, Stripe checkout, distributor catalog integration (Amsec, Emtek, Gardall), order routing, white-glove delivery options.	\$4,500
Total Build — Yours Forever, No Recurring Bill		\$13,000

Optional Post-Launch Support — À La Carte

Once the build is done, you're not locked in. Use us when you want, skip us when you don't. Most clients use 5–10 hours per quarter for content updates, new features, or strategy.

OPTION	WHAT'S INCLUDED	RATE
Hourly Support	Pay only when you need us — bug fixes, content tweaks, new pages, AI tuning. No retainer.	\$150 / hr
5-Hour Pre-Paid Block	10% off the hourly rate. Hours never expire. Use them for whatever you want.	\$675
Hosting + AI APIs	Vercel/AWS hosting, OpenAI, Twilio — all on your accounts. Pay providers directly. We don't markup. Estimated \$30–\$120 / mo total based on usage.	passthrough
30-Day Post-Launch Warranty	First 30 days after each phase ships, all bug fixes are free. No clock running.	included

vs The SaaS Vendor — The 5-Year Picture

SaaS Vendor: $\$560 \times 60 \text{ months} = \$33,600$, you own nothing, can't move the site, locked in. **Bogen.ai:** $\$13,000 \text{ once} + \sim \$50/\text{mo provider passthrough} (\$3,000 \text{ over } 5 \text{ years}) = \sim \$16,000 \text{ total, you own everything. Five-year savings: } \sim \$17,600. \text{ Plus you walk away with a real asset.}$

Optional Add-On — Paid Marketing

Once the storefront is live, a small Google Ads + Meta budget (\$300–500/mo) targeting "Boca Raton safes" and "South Florida locksmith" multiplies the impact. Ad spend billed directly to Thanks A Lock, fully transparent, never marked up.

— ROADMAP

6-Month Build Timeline

MONTH 1

Knowledge Base & Design

Sit-down interview with John to capture every product, service, FAQ, hour, policy, and pricing rule. Showroom photography. Website wireframes and brand approval. Knowledge base v1 deployed.

MONTH 2

Website & Chatbot Launch

New thanksalock.com goes live. AI chatbot embedded. Google Business Profile optimized. Local SEO foundation set. Phase 1 complete — the new digital front door is open.

MONTH 3

AI Receptionist Trained

AI phone agent trained on the knowledge base. Forward inbound numbers, A/B test against the current handling, refine until John approves the script and tone.

MONTH 4

Booking System Live

Online booking goes live for rekeys, installs, consultations, and safe deliveries. Calendar synced to staff. Deposit collection enabled. Phase 2 complete.

MONTH 5

E-Commerce Soft Launch

First 25–40 SKUs from the showroom live online with photos, specs, and delivery options. Stripe checkout active. First test orders processed end-to-end.

MONTH 6

Dropship + Full Catalog Live

Distributor catalog integrations complete. Hundreds of dropshippable safes added. First order routed to Amsec / Gardall ships directly to customer. Six-month performance review.

— WHO'S BUILDING THIS

Why Bogen.ai

Bogen.ai is the AI & marketing automation practice run by Eytan Benzeno (technologist, e-commerce pioneer) and Edmund Bogen (operator, real estate). We build production-grade AI agents and modern websites for service businesses that want the upside of the AI age without the noise. Local to South Florida. Skin in the game. Available for in-person sit-downs.

PRACTICE LEAD

Eytan Benzeno — technologist, AI specialist

CO-PRINCIPAL

Edmund Bogen — operator, real estate

LOCATION

South Florida — in-person available

SPECIALTY

AI agents, e-commerce, modern websites for service SMBs

— NEXT STEP

Let's Get Phase 1 on the Calendar

A 30-minute follow-up at the showroom or by phone. We finalize Phase 1 scope, lock the kickoff date, and start the knowledge base interview the same week. No long contracts, no lock-in, kill switch after any phase.

 **Email Sales to Kick Off**
