What One Input Produces

The Daisy Chain transforms a single source -- meeting transcript, listing notes, market insight -- into 20+ platform-optimized content pieces. Only 3-5% of your followers see any given post. Frequency is a feature when every post delivers value.

The 7-Step Workflow

1

Record the Source Material

DURING EVENT

Any transcript, voice memo, or meeting recording. One source becomes everything.

Source type:

Date:

Key topic:

Key takeaway:

2

Run the Mega-Prompt

~2 MIN

Paste transcript into Claude or ChatGPT with the Mega-Prompt (next page). In 90 seconds: summary, takeaways, and raw material for everything.

The Mega-Prompt

Copy this prompt. Paste your source material after it. Customize the bracketed sections for your market and brand.

Analyze the provided source material carefully.

First, write a comprehensive summary along with key takeaways and actionable items. All content must be actionable.

Step 1: Extract 3-5 key takeaways that are clear, impactful, and applicable by professionals aiming to grow their businesses.

Step 2: Generate the following content:

YOUTUBE DESCRIPTION (SEO-optimized, under 5,000 characters):

- Include emojis, keywords, hooks, and timestamps
- Include [YOUR NAME] in the title
- Add relevant hashtags for discoverability

FACEBOOK (5 Posts):

- Concise, engaging, actionable tips with emojis
- Include questions to stimulate interaction
- Vary topics across the 5 posts; add hashtags

INSTAGRAM (3 Posts):

- 1 carousel post with descriptions for 3-5 images
- 2 single-image/video posts with compelling insights
- Include relevant emojis and hashtags

LINKEDIN (3 Posts):

- Professional tone, valuable insights
- Use emojis sparingly; highlight real-world applications
- Link one post to the blog

AI AVATAR SCRIPTS (3 Scripts, 30-60 seconds each):

- Start with 'This is A.I. [YOUR NAME]...'
- Solution-focused, direct, implementation-oriented
- No camera or movement directions - narratives only

BLOG POST:

- Long-form article with SEO optimization
- Include calls to action throughout
- Professional yet accessible tone

EMAIL NEWSLETTER:

- Key insights formatted for email

- One clear CTA
- Subject line options (3 variations)

Throughout all content, occasionally encourage engagement with your services.

Steps 3-7: Deploy Your Content

3 YouTube Description

~3 MIN

SEO-optimized description with hooks, timestamps, keywords, and hashtags. Would take 30-45 minutes manually.

4 Social Media Content

~10 MIN

5 Facebook posts (end with questions), 3 Instagram posts (1 carousel + 2 single), 3 LinkedIn articles (thought leader tone).

Facebook:

Instagram:

LinkedIn:

5 AI Avatar Scripts

~5 MIN

Three 30-60 second scripts. Feed into HeyGen (\$2-3/clip) or Captions App (\$24/mo). Start with "This is A.I. [Your Name]..."

6 Blog Post

~5 MIN

Long-form SEO content. Add personal anecdotes and local data. Publish on your website, link from one LinkedIn post.

7 Podcast + Email Newsletter

~10 MIN

Upload to Google Notebook LM for AI podcast (free, 2-5 min). Reformat key insights for email with one clear CTA.

The Math

YouTube description	1
Facebook posts	5
Instagram posts	3
LinkedIn articles	3
AI avatar scripts	3
Blog + Podcast + Email	3

Total output from ONE source	~20 pieces
-------------------------------------	-------------------

Your time: 35-45 min	Traditional: 15-20 hrs
----------------------	-------------------------------

The "Interested Suitor" Test

Before you post anything, ask: **Would someone actively interested in buying or selling in my market want to see this?** If yes, post it. Post it again tomorrow with a different angle. If it's about you and your gratitude, rethink it.

5 Elements of Effective Prompts

- **Context:** Who are you? What's your market? What's the goal?
- **Specificity:** Colors, emotions, settings, actions. Think like a film director.
- **Format:** Numbered list? Paragraph? Emojis? Word count? Tone?
- **Examples:** Show the AI what good looks like. Paste a post you admire.
- **Constraints:** "No cliches." "Under 200 words." "No exclamation marks on LinkedIn."

LLM Stacking (Chapter 6):

Generate with Claude for brand voice, fact-check with ChatGPT, verify data with Perplexity. Combining AI tools produces results that exceed any single tool.
