

CLAUDE SKILLS QUICK REFERENCE

EDMUND'S MASTERMIND | Print & Keep Handy

WHAT IS A CLAUDE SKILL?

A **folder with instructions** that Claude loads automatically when relevant.

Build once, use forever.

MINIMUM FILE STRUCTURE

```
skill-name/  
└─ SKILL.md ← The only file you NEED
```

Just create a folder with a SKILL.md file inside. That's it!

SKILL.MD TEMPLATE (COPY THIS!)

```
---  
name: your-skill-name  
description: Clear explanation of what it does and when Claude should use it  
---  
  
# [SKILL NAME]  
  
## Purpose:  
[What this skill does]  
  
## When to Use:  
[Trigger conditions - be specific!]  
  
## Instructions:  
[Step-by-step guidance for Claude]  
  
## Examples:  
[Good vs. bad examples of output]  
  
## Style/Voice Guidelines:  
[Tone, formatting, words to use/avoid]
```

HOW TO UPLOAD YOUR SKILL

- 1 **Create folder** with your skill name
- 2 **Add SKILL.md** file inside
- 3 **Zip the folder** (right-click → Compress)
- 4 **Open Claude** → Settings → Capabilities → Skills
- 5 **Upload zip file**
- 6 **Test** by mentioning a task that should trigger it

5 ESSENTIAL SKILLS FOR REAL ESTATE

Skill	Description Trigger
brand-voice	"when writing client-facing content"
client-profiles	"when creating marketing"
market-expert	"when analyzing markets"
listing-description	"when writing property descriptions"
email-sequences	"when creating follow-up emails"

DESCRIPTION FORMULA (CRITICAL!)

BAD EXAMPLE:

"Helps with writing" (too vague - won't trigger)

GOOD EXAMPLE:

"Use when writing client-facing content including emails, social posts, listing descriptions, and marketing materials"

The description tells Claude WHEN to load your skill. Be specific!

PRO TIPS

- ✓ Start with ONE skill, test it, refine it
- ✓ Include examples of good AND bad output
- ✓ Keep descriptions specific (Claude uses them to decide when to load)
- ✓ Add templates and reference files as you grow
- ✗ Don't enable too many skills at once
- ✗ Don't include sensitive data in skill files

SKILL BUILDING CHECKLIST

- ☐ Purpose clearly stated
- ☐ Description has specific trigger words
- ☐ Instructions are step-by-step
- ☐ Examples included (good & bad)
- ☐ Voice/style guidelines defined
- ☐ Tested with real task
- ☐ Refined based on output
