

FREE PLAYBOOK · UPDATED APRIL 2026

The Claude Commands Library

46 working slash commands for Claude Code. Sales, marketing, ops, content, and setup — plus the exact steps to build your own.

46

COMMANDS

COST

How to Use This Library

Every command below is a working slash command for Claude Code. Three ways to use it: (1) paste the full command into Claude.ai or Claude Desktop and fill in the bracketed inputs, (2) save it as a legacy command in `~/.claude/commands/name.md` and type the slash, or (3) turn it into a reusable skill in `~/.claude/skills/`. The teach section walks both setup paths step-by-step.

Pro tip from Edmund: Don't try all 46 in one week. Pick the 3 that match tasks you already do weekly, save them as slash commands, and use them every time. You'll feel the ROI inside 7 days.

Build Your Own Slash Commands — Start Here

Option 1 (Simplest) — Create a folder `~/.claude/commands/`. Inside, make a markdown file — the filename becomes the command name. Example: `prospect-research.md` becomes `/prospect-research`. Paste any prompt from this PDF inside. Restart Claude Code. Done.

Option 2 (Recommended for teams) — Use the skills format. Create `~/.claude/skills/prospect-research/SKILL.md` with YAML frontmatter:

```
---
name: prospect-research
description: Analyze a prospect and produce pain points, triggers, and objections.
model: claude-sonnet-4-6
---

[prompt text here]
```

Personal folder (`~/.claude/...`) = cross-project. Project folder (`.claude/...` inside a repo) = scoped to that codebase. Always pick the easiest route that fits.

Section A — Sales (15 Commands)

From first research to closed deal. Prospecting, outreach, calls, and pipeline management — every command ends with a specific, sendable output.

Prospecting & Research

SALES **/prospect-research**

Background summary + pain points + buying triggers + likely objections from LinkedIn, website, and notes.

```
/prospect-research
Prospect: [NAME, TITLE, COMPANY]
Inputs: [PASTE LINKEDIN BIO, WEBSITE COPY, AND ANY CALL NOTES]
Produce:
1. 3-sentence background summary
2. Top 3 likely pain points (with why)
3. 3 buying triggers right now
4. 3 likely objections to my offer
5. 1 personalized opener I could use in outreach
```

Pro tip: Paste the last 3 LinkedIn posts they wrote — triggers jump out immediately.

SALES **/lead-qualification**

Classify a lead as cold/warm/hot with discovery questions and a reply draft per temperature.

```
/lead-qualification
Lead: [NAME + COMPANY]
Signals so far: [PASTE EMAIL, DM, OR FORM RESPONSES]
Output:
1. Temperature: cold / warm / hot (with 2 reasons)
2. 5 discovery questions to move them forward
3. Reply draft tuned to their temperature (under 120 words)
4. Recommended next step + timing
```

Pro tip: Rerun this weekly on stalled deals — temperature shifts fast.

SALES /list-segmentation

Bucket a CSV of leads into segments with a next-touch recommendation per segment.

```
/list-segmentation
Leads: [PASTE CSV OR TABLE]
My offer: [ONE LINE]
Output:
1. 3-5 segments with clear definitions
2. Count of leads per segment
3. Priority ranking (1 = hottest)
4. Next-touch recommendation per segment (channel + message angle)
5. Leads that should be dropped and why
```

Pro tip: Ruthlessly drop the "maybe never" segment — it costs more than it earns.

SALES /competitive-battlecard

Differentiators, competitor claim rebuttals, landmine questions, and a 60-second pitch.

```
/competitive-battlecard
Competitor: [NAME]
My business: [ONE LINE POSITIONING]
Produce:
1. 3 true differentiators (not marketing fluff)
2. 3 competitor claims + honest rebuttals
3. 3 landmine questions that expose their weakness
4. 60-second pitch I can say in a call
5. Proof points I should collect this quarter
```

Pro tip: Memorize the landmine questions — ask them early in discovery calls.

Outreach (Email, DM, Text)

SALES **/cold-email-generator**

5 variants of a 2–4 sentence cold email with a personalized first line per variant.

```
/cold-email-generator
Prospect: [NAME, TITLE, COMPANY]
Their context: [PASTE 1-2 RELEVANT FACTS]
My offer: [ONE LINE]
Write 5 cold email variants:
- 2-4 sentences max
- Personalized first line per variant (different angle each)
- Specific ask, not "quick chat"
- Subject line under 45 chars per variant
```

Pro tip: A/B test subject lines across 5 prospects before scaling.

SALES **/multi-step-outreach-sequence**

7-touch sequence across email, SMS, and DM with conditional branches.

```
/multi-step-outreach-sequence
Offer: [ONE LINE]
ICP: [TITLE / INDUSTRY / SIZE]
Channels available: email, SMS, LinkedIn DM
Build a 7-touch sequence over 14 days:
- Day, channel, message (under 90 words each)
- Branch: if opened no reply / replied positive / replied objection
- End with a clean break-up message
```

Pro tip: The break-up message often gets the highest response in the whole sequence.

SALES /dm-script

10 DM scripts (150 chars max) focused on a single question, not a pitch.

```
/dm-script
Platform: [INSTAGRAM / LINKEDIN / X]
ICP: [WHO I AM MESSAGING]
My angle: [ONE LINE]
Write 10 DM openers:
- 150 characters max
- One clear question per DM (not a pitch)
- Zero emojis unless platform-native
- Mix of curiosity, specific compliment, and useful observation
```

Pro tip: Never pitch in the first DM. Earn the second message first.

SALES /follow-up-bounce-back

3 light follow-ups (days 2–7) + 3 last-chance follow-ups (days 8–21).

```
/follow-up-bounce-back
Context of the original message: [PASTE]
Offer: [ONE LINE]
Write 6 follow-up messages:
- 3 light follow-ups for days 2, 4, 7 (under 60 words)
- 3 last-chance follow-ups for days 10, 14, 21
- Each adds value or reframes - no "just checking in"
- Final message closes the loop respectfully
```

Pro tip: If you wouldn't send it to a friend, don't send it to a prospect.

Sales Calls

SALES /discovery-call-outline

30–45 min call script with opening, qualification, problem deepening, and close.

```
/discovery-call-outline
Offer: [ONE LINE]
ICP: [WHO I SELL TO]
Build a 30-45 min discovery call outline:
1. Opening (2 min): frame + permission to ask questions
2. Qualification (8 min): 5 questions
3. Problem deepening (15 min): current state / cost of inaction / dream state
4. Solution framing (8 min): how I solve it, with proof
5. Close (5 min): next step options + calendar hold
Include 3 questions that surface hidden objections.
```

Pro tip: Never pitch in minute 1. Earn the right through questions.

SALES /objection-handling

Top 15 objections with short, call-ready, and reframe-question versions.

```
/objection-handling
Offer: [ONE LINE]
Typical buyer: [TITLE / INDUSTRY]
List the top 15 objections (price, timing, trust, competitor, internal).
For each, produce:
1. Short written response (2 sentences)
2. Call-ready version (under 25 words, spoken)
3. Reframe question that moves the conversation forward
```

Pro tip: Memorize 5. In real calls, only 5 objections actually come up.

SALES **/call-debrief**

Turn a transcript into situation, signals, hidden objections, follow-up, and close probability.

```
/call-debrief
Transcript or notes: [PASTE]
Produce:
1. Situation (3 bullets)
2. Positive signals (what they said or did)
3. Hidden objections (what they didn't say but implied)
4. Recommended follow-up: channel, timing, exact message
5. Close probability: low / medium / high + 1 reason
```

Pro tip: Record every call (with permission). The transcript is gold.

SALES **/upsell-cross-sell**

3 upsells + 3 cross-sells with email/call scripts framed as continuing the result.

```
/upsell-cross-sell
Existing client: [SNAPSHOT + WHAT THEY BOUGHT]
My full offer suite: [LIST]
Produce:
1. 3 upsells (bigger version of what they have) with reason each
2. 3 cross-sells (adjacent offer) with reason each
3. Email script for top pick (under 120 words)
4. Call talk track for top pick (under 60 seconds spoken)
Frame everything as continuing the result, not adding cost.
```

Pro tip: Run this quarterly on your top 10 clients. Expansion revenue is cheap revenue.

Pipeline & Numbers

SALES **/pipeline-review**

Stage-by-stage breakdown, close rate, bottlenecks, and a 30-day action list.

```
/pipeline-review
Pipeline data: [PASTE CSV OR TABLE WITH DEAL, STAGE, VALUE, AGE]
Produce:
1. Stage-by-stage summary (count, avg value, avg age)
2. Close rate by stage
3. Top 3 bottlenecks with why
4. 5 deals most likely to close in 30 days (with action)
5. 3 deals to kill this week
6. 30-day action list (bullets)
```

Pro tip: The deals you kill free more revenue than the ones you chase.

SALES **/daily-sales-brief**

7 questions + prioritized task list + time blocks + 3 must-send messages.

```
/daily-sales-brief
Today's context: [WHAT'S ON THE CALENDAR + TOP DEALS]
Answer these:
1. What one deal moves the week?
2. Who is stalled and why?
3. What's the highest-value 30-minute action?
Then output:
- Prioritized task list (top 5)
- Time blocks for the day
- 3 must-send messages (exact copy, under 80 words each)
```

Pro tip: Run this every morning at 7 AM before opening email.

SALES**/proposal-drafter**

Structured proposal from discovery notes — mirrors client language, 1–3 options, no pricing.

```
/proposal-drafter
Discovery notes: [PASTE]
Produce a proposal draft:
1. Situation summary (mirror their language)
2. Goals and success metrics (quote the client)
3. Scope with 1-3 options (starter / core / full)
4. Deliverables per option
5. Timeline
6. Next steps
Do not include pricing - leave a placeholder.
```

Pro tip: Deliver pricing verbally. Save the proposal for the paper trail.

Section B — Management & Operations (11 Commands)

The systems that turn activity into outcomes. SOPs, hiring, planning, and decision-making.

Systems & SOPs

OPS **/meeting-notes-to-actions**

Summary + decisions + action items (owner | task | date) + risks.

```
/meeting-notes-to-actions
Raw notes: [PASTE]
Attendees: [NAMES + ROLES]
Output:
1. 1-sentence summary
2. Decisions made (bullets)
3. Action items table: owner | task | due date
4. Open questions
5. Risks or red flags worth escalating
```

Pro tip: Send the recap within 10 minutes of the meeting ending, or don't bother.

OPS **/sop-builder**

Purpose + trigger + steps + quality checklist + metrics.

```
/sop-builder
Process: [WHAT IS THIS SOP FOR]
Current reality: [WHO DOES IT NOW, HOW]
Produce an SOP:
1. Purpose (1 sentence)
2. Trigger (what starts this process)
3. Steps (numbered, each starts with a verb)
4. Quality checklist (what "done right" looks like)
5. Metrics to track
6. Escalation path if something goes wrong
```

Pro tip: Hand the SOP to someone who hasn't done the task. If they can't follow it, rewrite it.

OPS /process-improvement

Identify bottlenecks + minimal-change version + clean-sheet version + 30-day plan.

```
/process-improvement
Current process: [DESCRIBE OR PASTE SOP]
Pain points: [LIST]
Produce:
1. Top 3 bottlenecks with evidence
2. Minimal-change version (2-3 tweaks that ship this week)
3. Clean-sheet redesign (what it would look like if we started over)
4. 30-day rollout plan
5. Metrics to prove it worked
```

Pro tip: Ship the minimal version this week. Keep the clean-sheet for next quarter.

OPS /ops-dashboard-ideas

Top 15 KPIs across marketing, sales, delivery, finance + tracking cadence.

```
/ops-dashboard-ideas
Business: [ONE LINE]
Team size: [NUMBER]
Revenue range: [APPROX]
Propose 15 KPIs split across:
- Marketing (top of funnel)
- Sales (pipeline to close)
- Delivery (fulfillment and quality)
- Finance (cash and margin)
For each: definition, target, tracking cadence (daily/weekly/monthly), source.
```

Pro tip: Watch 5 KPIs daily, 5 weekly, 5 monthly. Anything more = noise.

Hiring & Team

OPS **/role-scorecard**

Mission + top 5 outcomes with targets + core competencies + cultural behaviors.

```
/role-scorecard
Role: [TITLE]
What the role exists to produce: [ONE LINE]
Produce a scorecard:
1. Mission (one sentence)
2. Top 5 outcomes with measurable targets
3. Core competencies (skills required)
4. Cultural behaviors (how they work)
5. Red flags that disqualify a candidate
```

Pro tip: Write the scorecard before the job description. Always.

OPS **/job-description**

Non-generic JD with responsibilities, requirements, and a 90-day success definition.

```
/job-description
Role: [TITLE]
Scorecard: [PASTE OR SUMMARIZE]
Write a job description:
1. Hook opener (why this role matters)
2. What you'll actually do (not "support")
3. Required skills and experience
4. Nice-to-have
5. 90-day success definition (specific deliverables)
6. How to apply
Avoid corporate cliché ("rockstar", "ninja", "fast-paced").
```

Pro tip: A great JD filters bad fits out before they apply.

OPS **/interview-question-set**

Behavior + problem-solving + culture + coachability with a 1–5 rubric.

```
/interview-question-set
Role: [TITLE]
Must-haves: [LIST]
Produce 12 questions split across:
- Past behavior (STAR format)
- Problem-solving (scenario based)
- Culture fit
- Coachability / ego test
For each: question + what a 1/3/5 answer looks like.
```

Pro tip: The rubric is what keeps interviews honest across candidates.

OPS **/onboarding-30-60-90**

Goals, training, shadowing, milestones for the first 90 days in role.

```
/onboarding-30-60-90
Role: [TITLE]
Scorecard outcomes: [LIST]
Produce a plan:
- Days 0-30: goals, training, who they shadow, checkpoints
- Days 31-60: owning small wins, first deliverable
- Days 61-90: full ownership + metric to hit
For each phase: weekly 1:1 agenda and red flags to watch.
```

Pro tip: Bad hires show up in week 2. Don't wait 90 days to act.

Internal Planning

OPS **/weekly-planning**

Chief-of-staff pass: 10 questions + calendar + “if this is all I do” + delegate/eliminate.

```
/weekly-planning
This week's context: [BIG ROCKS + CALENDAR]
Role: chief of staff. Ask me 10 sharp questions first, then produce:
1. The 3 outcomes that matter
2. If this is all I do this week, the week is a win: [list]
3. Calendar blocks recommendation
4. Delegate list (task -> who)
5. Eliminate list (what to kill)
```

Pro tip: Run this Sunday night, review Friday afternoon.

OPS **/decision-clarifier**

Objective + constraints + pros/cons + reversibility + recommendation.

```
/decision-clarifier
Decision: [DESCRIBE]
Options: [A, B, C]
Produce:
1. Objective (what we are actually optimizing)
2. Constraints (time, money, team, risk)
3. Pros and cons per option
4. Reversibility (1-way or 2-way door per option)
5. Recommendation with one-paragraph reasoning
6. The question to ask before deciding
```

Pro tip: 2-way doors are for moving fast. 1-way doors are for thinking slow.

OPS

/policy-drafter

Under 600 words, plain language, FAQ-style “what to do if” examples.

```
/policy-drafter
Policy area: [EXAMPLE: REMOTE WORK, EXPENSES, PTO]
What we actually want: [GOAL IN ONE LINE]
Write a policy under 600 words:
1. The rule (one paragraph, plain language)
2. Why it exists
3. What to do if... (4-6 scenarios)
4. Who to ask if unsure
Avoid legal-ese. Must be readable by a new hire on day one.
```

Pro tip: If you need a lawyer to read your policy, employees won't.

Section C — Marketing (9 Commands)

Positioning, offer design, funnels, and performance. Every command is built to stop guessing.

Strategy & Positioning

MARKETING **/offer-clarity**

Value prop + who it's for / not for + 5 benefits + 5 proof elements to collect.

```
/offer-clarity
Offer: [NAME + PRICE]
Rough description: [PASTE]
Produce:
1. Value prop (one sentence, no jargon)
2. Who it's for (3 specific bullets)
3. Who it's NOT for (3 specific bullets)
4. 5 benefits (outcomes, not features)
5. 5 proof elements to collect (testimonials, screenshots, numbers)
```

Pro tip: "Not for" is more valuable than "for". It tells the right people to stay.

MARKETING **/ideal-client-profile**

3 personas with demographics, psychographics, goals, fears, and buying journey.

```
/ideal-client-profile
Offer: [ONE LINE]
Clients I love: [2-3 EXAMPLES]
Produce 3 personas. For each:
1. Name + role archetype
2. Demographics (age, title, income, location)
3. Psychographics (values, fears, aspirations)
4. Top 3 goals right now
5. Top 3 fears / objections
6. Buying journey (trigger -> research -> decision -> purchase)
```

Pro tip: Name the persona after a real client. Makes copy decisions easier.

MARKETING**/message-resonance-check**

Copywriter critique of a landing page: clarity, proof, friction + 3 alt hooks.

```
/message-resonance-check
Landing page copy: [PASTE OR URL]
Target audience: [DESCRIBE]
Critique as a senior copywriter:
1. Clarity (would a 5th grader understand the offer?)
2. Proof (what's missing?)
3. Friction (what makes someone bounce?)
4. 3 alternate headline hooks
5. 3 alternate CTA variations
Rank all feedback by impact.
```

Pro tip: Fix clarity first. Nothing else matters if they don't get the offer.

Ads, Landing Pages, Funnels

MARKETING**/ad-concept-pack**

10 hooks + 5 angles + example copy for top 3 angles.

```
/ad-concept-pack
Offer: [ONE LINE]
Audience: [DESCRIBE]
Platform: [META / TIKTOK / LINKEDIN]
Produce:
1. 10 hook lines (each 1 sentence)
2. 5 angles (problem, transformation, myth-buster, proof, us-vs-them)
3. Full ad copy for top 3 angles: hook + body + CTA
4. Suggested visual for each top angle
```

Pro tip: Test hooks first, creatives second, audiences last.

MARKETING**/landing-page-structure**

Wireframe: headline, proof, problem/solution, offer, FAQ, risk reversal.

```
/landing-page-structure
Offer: [ONE LINE]
Audience: [DESCRIBE]
Goal: [EMAIL OPT-IN / SALES / CALL BOOK]
Output a full landing page wireframe:
1. Above the fold: headline + sub + CTA
2. Proof strip (logos or numbers)
3. Problem section (3 pain points)
4. Solution section (3 benefits, feature-backed)
5. Offer details + pricing
6. FAQ (5 questions)
7. Risk reversal
8. Final CTA
```

Pro tip: The FAQ is where you handle objections the copy didn't kill.

MARKETING**/funnel-map**

Entry points + pages + emails + metrics + retargeting end-to-end.

```
/funnel-map
Offer: [ONE LINE]
Current assets: [LIST PAGES, LEAD MAGNETS, EMAIL SEQUENCES]
Map the full funnel:
1. Entry points (paid, organic, referral, direct)
2. Pages in order with their job
3. Email sequences tied to each page
4. Metrics to track at each stage (CVR, CTR, open rate)
5. Retargeting moments (who to catch and when)
6. Top 3 holes to fix first
```

Pro tip: Every funnel has 1 broken step eating 50% of the leads. Find it.

Analytics

MARKETING /campaign-postmortem

What worked / didn't + root cause + 5 specific tests to try next.

```
/campaign-postmortem
Campaign: [NAME + GOAL]
Results: [PASTE NUMBERS]
Inputs: [ASSETS + AUDIENCE + OFFER]
Produce:
1. What worked (with evidence)
2. What didn't (with evidence)
3. Root cause analysis (not symptoms)
4. 5 specific tests for the next version (hypothesis + measurable outcome)
5. What I'd scrap entirely
```

Pro tip: Postmortem within 72 hours of the campaign ending. Memory fades fast.

MARKETING /content-performance-review

Best topics, hooks, formats, times + 10 new ideas based on what works.

```
/content-performance-review
Platform: [INSTAGRAM / LINKEDIN / YOUTUBE]
Data: [PASTE TOP 20 POSTS WITH VIEWS / ENGAGEMENT]
Produce:
1. Top 5 performing topics
2. Top 5 performing hooks (pattern)
3. Best formats (video, carousel, single image)
4. Best post times / days
5. 10 new content ideas based on what works (with working titles)
```

Pro tip: Your audience tells you what they want. Stop guessing.

MARKETING**/offer-feedback**

From testimonials: what clients value, language they repeat, 3 improvements.

```
/offer-feedback
```

```
Testimonials and reviews: [PASTE 10-20]
```

```
Produce:
```

1. Top 3 things clients value most (with quotes)
2. Recurring language they use (exact phrases)
3. 3 specific improvements to the offer based on signal
4. 3 copy updates for landing pages (before -> after)
5. 3 testimonials to feature and where

Pro tip: The exact phrases your clients use should become your headline.

Section D — Content & Email (7 Commands)

From strategic pillars to shipped content. Faster drafts, better hooks, fewer blanks.

CONTENT **/content-pillar-plan**

90-day content strategy with 4–6 pillars, weekly themes, formats.

```
/content-pillar-plan
Business: [ONE LINE]
ICP: [WHO I SERVE]
Offer: [WHAT I SELL]
Produce a 90-day content plan:
1. 4-6 content pillars (each maps to a buyer stage)
2. Weekly themes (12-13 weeks)
3. Formats per platform (feed post, short video, carousel, email)
4. 3 CTAs per pillar
5. How each pillar moves a buyer closer to purchase
```

Pro tip: Fewer pillars = stronger brand. 4 beats 6 every time.

CONTENT **/post-repurposer**

Long-form → 10 short posts + 5 email angles + 3 video ideas.

```
/post-repurposer
Long-form piece: [PASTE ARTICLE, PODCAST TRANSCRIPT, OR VIDEO SCRIPT]
Produce:
1. 10 short-form posts (each 50-120 words) with hook + body + CTA
2. 5 email subject/angle pairs with a one-line pitch
3. 3 video ideas with 3-beat outlines (hook / middle / payoff)
```

Pro tip: One long-form piece should fuel 2 weeks of social content.

CONTENT /scripts-from-outline

Outline → 3–5 min video + 60-sec short + carousel with hook/slides/CTA.

```
/scripts-from-outline
Outline: [PASTE BULLET POINTS OR IDEA]
Produce:
1. 3-5 minute video script with: hook (first 7 seconds), 3-part body, close + CTA
2. 60-second short script: hook, single payoff, CTA
3. Carousel version: cover slide + 6-8 slides + final CTA slide
Match a conversational, confident tone.
```

Pro tip: Your hook earns the next 7 seconds. Spend 80% of your edit there.

CONTENT /content-idea-generator

50 ideas split across problems, transformations, behind-scenes, objections.

```
/content-idea-generator
ICP: [WHO I SERVE]
Offer: [ONE LINE]
Produce 50 content ideas, split:
- 12 "problem the audience has" ideas
- 12 "transformation / result" ideas
- 13 "behind-the-scenes / process" ideas
- 13 "objection-busting / myth" ideas
Each idea = 1 working title + 1 hook line.
```

Pro tip: Run this once a quarter. You'll never run out of content again.

CONTENT /nurture-sequence

7-email sequence for new lead-magnet subscribers (goal + subject + body per email).

```
/nurture-sequence
Lead magnet: [TITLE + FORMAT]
Offer to promote: [ONE LINE]
My voice: [DESCRIBE OR PASTE SAMPLE]
Write 7 emails (days 0, 1, 2, 4, 6, 9, 12). For each:
1. Goal of the email
2. Subject line (under 55 chars)
3. Preview text (under 90 chars)
4. Body (150-250 words)
5. Single clear CTA
```

Pro tip: Day 0 is the most opened. Make it carry the offer, not just deliver the magnet.

CONTENT /newsletter-drafter

Main story + 2-3 recommendations + soft transition to the offer.

```
/newsletter-drafter
Audience: [LIST DESCRIPTION]
This week's theme: [ONE LINE]
Main story idea: [1-2 SENTENCES]
Write the newsletter:
1. Subject line (3 options)
2. Main story (250-400 words)
3. 2-3 curated recommendations (1 sentence each + link placeholder)
4. Soft transition to my offer (no hard pitch)
5. Sign-off in my voice
```

Pro tip: Open rate lives in the subject line. Spend 10 minutes on it.

CONTENT**/re-engage-cold-list**

4-email reactivation: value, survey, last chance, sunset.

```
/re-engage-cold-list
List context: [SIZE, LAST ENGAGED, TOPIC FOCUS]
Offer: [ONE LINE]
Write a 4-email reactivation sequence:
1. Value email (give something useful, no ask)
2. Survey email (what do you want from me?)
3. Last chance email (specific offer + deadline)
4. Sunset email (confirm they want to stay)
Each under 150 words. Respect their time.
```

Pro tip: Cutting a dead list feels scary. Deliverability agrees it's the right call.

Section E — Claude Setup (4 Commands)

Session-level commands that prime Claude to work the way you want.

SETUP `/reset-context`

Clear context and force 3 clarifying questions before continuing.

```
/reset-context
Forget everything we just discussed.
Before producing anything new, ask me 3 clarifying questions:
1. What's the goal of this session?
2. Who is the audience / reader?
3. What format should the output take?
Wait for my answers before you write anything.
```

Pro tip: Run this whenever a chat starts producing generic output. Works like a reboot.

SETUP `/session-setup-sales`

Role: sales assistant. Always asks about CRM and format first.

```
/session-setup-sales
For this session, you are my sales assistant.
Always:
- Ask about CRM context (tool, pipeline, current stage) before drafting
- Ask what output format I need (email, call script, doc)
- Keep tone direct, no fluff
- Default to 80 words max unless I ask for more
Start by asking: "What are we working on in the pipeline today?"
```

Pro tip: Paste this as the first message of every sales work session.

SETUP /session-setup-marketing

Role: marketing strategist. Always returns a 3-part response.

```
/session-setup-marketing
For this session, you are my marketing strategist.
Every response must have 3 parts:
1. Strategic take (what I should actually do)
2. Tactical execution (how to ship it this week)
3. Risk / what could go wrong
Ask clarifying questions if the brief is vague before producing output.
```

Pro tip: The "risk" section is where the real value lives. Force it.

SETUP /daily-brief

Summarize today's sales, marketing, ops + 3 priorities for tomorrow.

```
/daily-brief
Today's activity: [PASTE CALENDAR, DEALS MOVED, CONTENT SHIPPED, ISSUES]
Produce:
1. 3-bullet summary of today (wins, blockers, surprises)
2. Pipeline movement (what advanced, what stalled)
3. Marketing signal (what got traction, what didn't)
4. Top 3 priorities for tomorrow with first action for each
5. One question I should be asking myself
```

Pro tip: Run this at 5 PM before closing the laptop. Better sleep, better Monday.

Appendix: The Full Build-Your-Own Guide

Where to put commands

1. `~/.claude/commands/` — personal, works in every project on this machine
2. `.claude/commands/` inside a project repo — scoped to that project only

Option 1 — Legacy commands (the easiest route)

1. Open your terminal and run `mkdir -p ~/.claude/commands`
2. Create a file with the command name, e.g. `cold-email-generator.md`
3. Paste the prompt from this PDF (or your own) inside the file
4. Save, restart Claude Code (or the Claude desktop app)
5. Type `/cold-email-generator` in any chat — done

Option 2 — Skills format (recommended for teams / shared use)

1. `mkdir -p ~/.claude/skills/cold-email-generator`
2. Inside, create `SKILL.md` with YAML frontmatter (see below)
3. Optionally add `TEMPLATES.md`, `EXAMPLES.md`, or data files
4. For web UI users: zip the folder, upload under Settings → Features → Skills

```
---
name: cold-email-generator
description: Generate 5 personalized cold email variants.
model: claude-sonnet-4-6
---

[prompt body from this PDF]
```

When to use which — Option 1 is the right call 90% of the time. Use Option 2 when a command is worth versioning, sharing across a team, or bundling with supporting files. Always start with Option 1, upgrade only when the command proves its worth.
