EXECUTIVE SUMMARY

Getting You Found — On Google and Inside AI

You asked for two things: stronger SEO, and visibility when buyers and sellers ask AI tools like ChatGPT and Perplexity for a New York agent. This proposal delivers exactly that — and shows you how to do it without renting your web presence forever.

What You Told Us

- Your website is **rented from Luxury Presence at \$500/month** — you don't own it, and you can't leave with it.
- Your **domain authority is stuck at roughly 5/100**, and the blog content you pay for sits on a Luxury Presence page, not your own site.
- Luxury Presence quoted you **another \$1,500/month for SEO** on a 12-month contract — from a team that asked *you* what needed to be done.
- You want to show up in **AI search — ChatGPT, Perplexity, Claude, Google AI Overviews** — not just traditional Google results.

You've Already Proven Visibility Pays

\$27M

Roughly \$300 in self-managed Google Ads generated an estimated \$27M in sales over two years.

That is the entire thesis of this proposal. When the right people can find you, the return compounds. SEO and AI-search visibility are the same play — they just keep working without a per-click bill.

Our Approach — Two Phases

PHASE 1 — START NOW

SEO + AEO

A monthly retainer that begins immediately, on your existing site

PHASE 2 — THE UPGRADE

Own It

Leave the subscription model — own your website outright

THE DIFFERENCE

A Team

Practitioners who do the work — not a vendor reading from a script

THE DIAGNOSIS

Why Your SEO Isn't Working

This isn't an effort problem — it's an architecture problem. Three structural issues are holding your visibility down, and all three trace back to one root cause: you don't own your website.

1

You're renting your content

Every blog post and page you've paid Luxury Presence to produce builds *their* domain's authority — not yours. That is why your domain authority is stuck near 5/100. You are paying to improve an asset you will never own.

2

Your current site is nearly invisible to AI

Luxury Presence sites are heavy JavaScript applications — each page of your current site weighs **450–630 KB**. AI crawlers (GPTBot, ClaudeBot, PerplexityBot) and modern search systems favor fast, clean, readable HTML. If an AI engine can't cleanly read your page, it cannot cite you in its answer.

3

You can't touch the levers that matter

On a rented site you can't fully control structured-data markup, the `robots.txt` file, page speed, or how content is organized for AI extraction. Those *are* the AEO levers. The platform that makes you unrankable is also the one selling you SEO.

The honest conclusion

You can do real, lasting SEO and AI-search optimization — but not on a rented Luxury Presence site. That's why this proposal starts where you are today, then shows you the upgrade that removes the ceiling entirely.

PHASE 1 — START IMMEDIATELY

SEO + AEO On Your Existing Site

No rebuild required to begin. We start optimizing within days of signing — capturing every ranking and AI-visibility point your current site allows while Phase 2 is prepared in parallel.

TRADITIONAL SEO — GOOGLE

Rank Higher in Search

- ✓ Technical SEO & Core Web Vitals audit and fixes
- ✓ On-page optimization — titles, meta descriptions, headings, internal linking
- ✓ Google Business Profile optimization & local citation building
- ✓ Content strategy — neighborhood, buyer and seller guides
- ✓ Backlink & digital-PR outreach to lift domain authority
- ✓ Image geo-tagging and alt-text for local relevance
- ✓ Monthly rank tracking, Search Console & GA4 reporting

ANSWER-ENGINE OPTIMIZATION — AI

Get Cited Inside AI

- ✓ Structured data / schema markup for AI extraction
- ✓ Answer-first content — clear, quotable question-and-answer formatting
- ✓ AI-crawler accessibility review — GPTBot, ClaudeBot, PerplexityBot, Google-Extended
- ✓ Entity building — a consistent identity across the web so AI recognizes "Iryna Ferenets" as a New York real-estate authority
- ✓ Citation-diversity outreach — getting you referenced on the third-party sources AI engines trust
- ✓ AI-visibility tracking — monitoring when you actually appear in ChatGPT and Perplexity answers

Phase 1 Investment — SEO + AEO Retainer: \$1,500/month

A flat monthly retainer with **no 12-month lock-in**. This is the same figure Luxury Presence quoted you for SEO alone — but here it includes full AI-search optimization, every deliverable above, and the freedom to leave any time.

- ✓ All Search Engine Optimization deliverables listed above
- ✓ All Answer-Engine Optimization deliverables listed above
- ✓ Monthly performance report — rankings, traffic, and AI-visibility
- ✓ Direct access to the people doing the work — no ticket queue
- ✓ Month-to-month — cancel any time, no contract

What Phase 1 cannot fix

On a rented Luxury Presence site we cannot fully control site speed, structured data, the robots.txt file, or content ownership. Phase 1 captures every point available today — but the platform itself is a ceiling. Phase 2 removes it.

PHASE 2 — THE UPGRADE

Stop Renting. Own Your Website.

Today you pay \$500 every month, forever, to rent a website you can never keep. Phase 2 ends that — one fixed build cost, and the site is yours outright. No subscription to Luxury Presence. No subscription to Bogen.ai. You own the asset.

LUXURY PRESENCE

The subscription model

Monthly cost **\$500/mo — forever**

Who owns the site **Luxury Presence**

5-year website cost **\$30,000 — own nothing**

Owning With Bogen.ai

RECOMMENDED

Buy the asset once

Monthly cost **~\$120–\$200/mo — your vendors**

Who owns the site **You — outright**

Where your content lives **Your domain**

If you ever leave **You keep everything**

Built for AI search **Yes — from day one**

Upfront cost **\$7,500 one-time**

5-year website cost **~\$16,500 — and you own it**

15 months

The one-time build cost of \$7,500 equals just 15 months of the rent you already pay.

You are already spending \$500/month. Redirect 15 months of it — once — and you own your website instead of renting it. From that point on, your site costs drop to roughly \$120–\$200/month, paid directly to your own vendors, and you never write Luxury Presence another check.

What the \$7,500 Build Includes

A Website You Own Outright

Code, content, design, and domain — all yours. No rental, no platform lock-in, ever.

Built for Speed

Lightweight, fast-loading HTML — the opposite of the 450–630 KB pages you have now.

AI-Search Ready From Day One

Schema markup, clean structure, and crawler access built in — so AI engines can read and cite you.

Live IDX Listing Feed

Integrated REBNY RLS property search — the IDX experience your buyers expect.

Your Content, Migrated

Every blog post and page moved onto your domain — so the ranking equity finally builds for you.

Fully-Licensed Design

Typography and assets cleanly licensed to you — no Luxury Presence copyright entanglements.

Hosting Handoff

Set up on infrastructure you control and own the logins to — not a landlord's account.

30-Day Launch Support

Post-launch support included so the transition off Luxury Presence is smooth.

After Launch — Your Costs, Fully Transparent

Once the site is yours, you assume the running costs directly — and Bogen.ai marks up none of them. These are real third-party services you pay and control:

- **Hosting** — approximately \$20–\$40/month
- **IDX listing feed** (REBNY RLS vendor) — approximately \$50–\$120/month
- **REBNY compliance** — roughly \$42/month equivalent (\$500/year)

Estimated total: ~\$120–\$200/month — paid straight to your vendors, versus \$500/month to Luxury Presence for a site you never own.
